CARBON, ALBERTA, THURSDAY, MARCH 19, 1931

\$2.00 A YEAR IN ADVANCE

C.F.A.A. ORGANIZED FOR 1931 SEASON

The annual general meeting of the Grand Forks Athletic Association was held in the Webb school on Saturday night, March 7th. Mr. A. G. Anderson was elected chairman and Miss Beck with secretary pro-tem.

T. J. King, the retiring secretary, gave a report of the financial standing of the Association, which showed a balance of \$86 for the year ending 1930.

There was quite a large number of members present and much interest was taken in the discussion of the several questions put forward at the meeting, one of which was the Garret skating rink coming under the control of the Association in future.

A pleasant surprise of the evening was the donation to the Association of the proceeds of the play "Paddy makes Things Hum," put on in Hesketh and the members wish to take this opportunity to thank all those who took part in the play and the Association greatly appreciates their generosity.

The Grand Forks Athletic Association will hold Wednesday evening and Sunday afternoons for practice and other recreation, and there will be additional attractions at the grounds this season for the smaller children.

Membership fees are lower for 1931. Members over 18 years of age, 50c; under 18 years, 25c.

The financial position of the Association to date with all accounts paid, is, Cash on hand, \$9.30.

The following officers were elected for the year 1931:

Manager, C. Anderson. Captains, for Baseball, R. Garrett; Softball, A. Hudson; Ladies' softball, Grace Gynn; Ladies' Basketball, Mrs. C. Anderson.

Coach, Boys' baseball, S. Parkens. Secretary-Treasurer, Mrs. C. Anderson.

The slogan of the members for this year is that of the hum who broke into the brewery: "We have no money but we are going to have a good time."

T. J. King

PUBLIC NOTICE

NOTICE IS HEREBY GIVEN that any person known to spread or pile up outside their premises any burning or hot ashes where they are liable to cause fire, will be prosecuted to the full extent of the law.

BY ORDER OF THE VILLAGE COUNCIL

NEWS FROM THE SOUTH

On Monday evening, March 16th, the Sunday school classes No. 7 and 8, of the First German Baptist Church (these two classes consisting of young married people only) gave Mrs. A. Ittermann a real birthday surprise in the form of a surprise party. Every one there reported a good time, there being 19 couples present in all. At ten o'clock refreshments were served and a sing song and prayer took place, bringing to a close a most pleasant evening's entertainment.

Mr. Marshman and family arrived last week from Eugene, Oregon, and have taken over their old farm, after an absence from Canada for eleven years.

Mr. and Mrs. Christ Bertsch Jr. went to Wetaskiwin by train to visit for a few days with Mrs. Bertsch's sister, Mrs. Dickau.

J. S. Bertsch made a trip to Carstairs on Saturday last.

John Weigum of Trochu, spent the week end at the home of Mr. and Mrs. J. A. Ohlhauser.

The marriage of John Permann of Carbon and Bertha Tetz of Three Hills, took place at the home of Rev. and Mrs. A. Ittermann, Carbon, on Tuesday, March 10th. The young couple will make their home on the farm 12 miles south east of Carbon.

John A. Ohlhauser made a business trip to Calgary on Wednesday.

Tom Renn had the misfortune to upset his big yellow truck, loaded with gravel, near Hesketh, on Tuesday. Fortunately Renn was not hurt and little damage was done to the truck.

Rev. and Mrs. A. Ittermann motored to Leduc on Tuesday where they will take in a four-day convention.

CLAYPOOL HEADS CO-OPERATIVE STOCK PRODUCERS

At an organization meeting of the board of directors of the Alberta Co-operative Livestock producers, held at the company's offices, Edmonton stockyards on Friday, March 7, following their annual convention of the two previous days, A. B. Claypool, M.L.A. for Didsbury Constituency, was again chosen president; John Evans, Taber, first vice-president; Fred McDonald, Clyde, second vice-president and secretary of the board.

ALBERTA NEWS

The Town council has a sweet little job! Besides being called upon to decide who may or may not have milk to drink and whether tobacco and cigarettes are real relief necessities, they are now called upon to assist in suppressing all Bolshevist propaganda in the district.—Three Hills Capital.

Jack Kirkland suffered a painful accident at the Carstairs curling rink last week. At the end of a game when the rocks were being taken back, one of the rocks struck his heels, his feet were knocked from under him and he lit on his back on the rock. He was taken to the Calgary hospital, but it is stated that he is not seriously hurt.

Many of the farmers in the Strathmore district report losing cattle and pigs during the last snow storm.

Fire last week end destroyed the Waterbury Drug Store at Queenstown. There was considerable loss.

The Cartier Company has installed a modern drilling equipment to put down their oil well west of Olds, and it is expected that this well will be "spudded in" shortly.

Drumheller is supplying married men with relief in the form of work on the waterworks extension.

On removing the craw of a duck, Mrs. L. Rambo discovered two small nuggets and three flakes of crude gold. The duck was bred on the McIntosh farm near Drumheller and the finding of the gold is interesting in view of the fact that the McIntosh farm is situated on the flat prairie where there are neither creeks or coulees.

A. McWilliams, west of High River, had three granaries containing 3500 bushels No. 1 Hard wheat destroyed

"PRENEZ GARDE"

I am not much of a linguist. I find that I can get into quite enough trouble with one language without adding to the number. In common with a lot of other chaps, various school teachers tried to hammer some rudiments of French and Latin into my thick head in our adolescent days. The most of it is long forgotten. I have often wished, however, that I had taken up French more seriously. Many a time in after years it would have been mighty useful in business. It is true, I have a rough blacksmith's smattering of a few phrases with which to ask for food, lodging and other things. When I use them, however, I am always on the lookout for a quiet smile of amusement on the listener's face. In spite of that, I can manage to make myself understood even though my accent is more Belfast than Paris. "Je vends l'encre pour l'imprimeurs," "Avec le bon cigar trois pour vingt cinque," "Passe le beurre," "Bonne sante" or Parlez vous Anglais" are some expressions which prove very useful in the right environment.

I have a very high regard for our French-Canadian citizens. Having done business with many of them I have some understanding of their many splendid qualities. Their language is descriptive, picturesque, and at times very poetical (with and without gestures).

Some of their expressions are hard to literally translate into English. "Prenez Garde" is one of these multum in Parvo expressions. Freely translated (very freely) it may be construed into: "Watch your step;" "Stop, look, listen;" "Be careful;" "Be on guard;" "Don't be hasty;" "Look out;" "S.O.S.;" "Danger ahead;" "arf a mo' matey;" "Mind your p's and q's;" "Look before you leap;" "Take care;" "Go easy;" "Be prepared;" "Breakers ahead;" "Step cautiously;" "Be alert;" "Safety first."

No better advice can be given in any transaction—whether buying pianos, pickles or printing ink—butter beef or bologna—wheat options or oil stocks—than this simple expression of our French-Canadian conferees — "Prenez Garde."

PRINCE OF WALES IS ASKED TO OPEN GRAIN EXHIBITION

Representing the Canadian Government at the British Trade Exposition, Buenos Aires, South America, Sir Geo. Perley, Minister without Portfolio, is carrying with him an official invitation from the government of Canada to the Prince of Wales to open the World's Grain Exhibition and Conference at Regina in 1932.

The Prince of Wales is touring South America with Prince George, his chief object in visiting Buenos Aires being to open the monster British Trade exhibition. Sir Geo. Perley will, on behalf of the Canadian Government, invite the Prince to visit Canada next year and to open the world-wide grain exhibition and conference on July 25th.

OLD TIME DANCE SUCCESSFUL

The dance held in the Farmers Exchange hall on Tuesday night, under the auspices of the Carbon Old Timers Association, proved to be a popular event and a large crowd turned out on the occasion. Local talent furnished appropriate music. As a result of the dance the Committee turned about \$25 over to the Association after all expenses were paid.

by fire during the dust storm on March 3rd. It is thought that the fire was started by some careless smoker on the roadside near the granaries.

Squadron Leader Tudhope of High River has been awarded the McKee trophy for 1930 for having rendered the most meritorious service to the advancement of aviation during 1930.

Alberta rivers are the lowest in 15 years according to figures issued by the Calgary branch of the Dominion hydrometric service. Lack of snowfall is the cause given.

The ice in the Red Deer River is now unsafe for crossing, several cars having broken through the ice recently.

NOTICE TO CREDITORS AND CLAIMANTS

IN THE ESTATE OF JOHN ALEXANDER MACDONALD, late of Carbon, Alberta, Station Agent, Deceased.

NOTICE is hereby given that all persons having claims on the Estate of the said John Alexander MacDonald, who died on the 19th day of December, A.D. 1930, are required to file with the undersigned Executor, by the 10th day of May, A.D. 1931 a full statement duly verified of their claims and any securities held by them, and that after that date the Executor of his Will will distribute the assets of the Deceased among the parties entitled thereto, having regard only to the claims of which notice has been so filed or brought to its knowledge.

DATED this 12th day of March, A. D. 1931.

The London and Western Trust Company, Ltd., Michael Building, Calgary, Alberta.

Per Its Solicitor, JOSEPH J. GREENAN, Carbon, Alberta

ROCKYFORD WINS MACDONALD CUP

A debating team from the Rockyford High School challenged the Carbon school for the MacDonald Debating Trophy and this debate was held in the Elks Hall, Carbon, on Friday night March 13th. The subject of the debate was: "Resolved that the British North America Act should be amended in such a manner as to provide for a national school system." There were three speakers on each side, the two Bragg brothers and Miss Helen Henderson of Rockyford; and Louise Pratt, Paul Greenan and Wilfred Foxon for Carbon.

When the judges totalled up points in this debate, the Rockyford team had the honor of winning by a small margin and became winners of the MacDonald Trophy, which they will have to defend, should a challenge be put in.

The judges were: Rev. Wm. McNichol, Carbon; Rev. Gilbert, Rockyford; and Rev. Batchelor, Aeme, D. G. Code acted as chairman of the meeting and Hugh MacDonald made the presentation of the cup.

During the interval when the judges were making their decision, community singing was indulged in.

SPROUTING FOR EARLY POTATOES

(Experimental Farm Notes)

About the first of April, sound, medium sized early potatoes are selected from the winter storage. If treatment for any disease is required it should be done at this time. The potatoes are spread out in single layers with seed end up, where the temperature is approximately 50 degrees F. and where there is a little light. In about three weeks the temperature can be gradually increased (not more than ten degrees) and a moderate amount of light introduced. By the middle of May the potatoes are ready for planting.

Great care must be exercised at this time. Cutting must be done most carefully so as not to break any sprouts which will be long and tender. In planting, it is not practical to plough out a furrow; drop in the potato seed and cover with a plough, because the sprouts will be broken off. A safe procedure is to plant with a spade or digging fork; lay the seed carefully and cover gently.

Experiments for a period of years comparing sprouted versus non-sprouted potatoes, have been carried out at the Dominion Experimental Station at Scott. Sprouted potatoes have resulted in earliness and increased yield. More rapid emergence was always in evidence. They were earlier flowering, and potatoes were ready for use ten to 18 days earlier, depending on the season. Furthermore, in a seven-year test, an increase of 52 bushels per acre in favor of sprouting was obtained for an early maturing sort and 66 bushels per acre increased gain when a late maturing variety was sprouted.

Following the settlement of the weight dispute between fishermen and buyers at Prince Rupert, shipments of fresh fish from the Pacific seaport were shipped last week to Chicago for distribution throughout the middle states. The Prince Rupert fish was shipped in express heater cars.

Reckless Motor Driving

With the approach of spring the time draws near when once again the roads and highways of the country will be thronged with tens of thousands of automobiles and the streets of our larger cities jammed with traffic. Soon tourists will again be in our midst, while week-end trips from our centres of population to summer resorts and other vacation spots will engage the attention of the residents of all urban and many rural sections.

Is the result to be the hanging up of another new high record number of fatalities arising out of automobile accidents? Is 1931 to provide another dark spot on our much vaunted civilization with as much recklessness in automobile driving and resultant deaths as were recorded in 1930? Are the more and better highways being provided all over the country to have the tragic outcome of steadily adding to the death toll because people using such better roads exercise less care in operating their cars?

Recent figures published for the city of Regina show a very large increase in the number of car accidents reported in 1930 as compared with previous years, and what is true of Regina is true of practically every city in Canada and the United States.

A United States magazine, in a recent issue, dealt with the rising death toll due to reckless automobile driving across the line. While these figures apply only to the United States, they disclose a state of affairs which is equally applicable to Canada. A few of the facts established may well be quoted.

Motor accidents in the United States, in 1930, killed 32,500 people, and injured more than 960,000,—in other words, one million victims. More than 2,000 little children under five years of age were killed, and more than 45,000 were injured. The magazine notes that the World War did not take a greater toll of American lives in battle.

Remarkable as it may seem, this magazine considers that the most encouraging aspect of this appalling loss lies in the fact that recklessness was its principal cause, saying: "If carelessness and over-confidence kill and injure so many, carefulness and consideration can prevent such losses."

Evidence goes to show that the majority of accidents occurred on straight and dry roads, in broad daylight, with experienced and mature drivers at the wheel. In an overwhelming majority the machine functioned properly; the man was at fault. He took unjustifiable chances.

In a striking analysis of accident reports from forty States, a well known insurance company dispels many cherished illusions on this subject. Contrary to a common impression, women were proved to be safer drivers than men. Young men at their best physical development were the worst offenders.

Improper driving and nothing else was responsible for more than two-thirds of all the deaths and injuries recorded in 1930. Speeding, driving on the wrong side of the road, and failure to grant right-of-way, all evidences of improper driving, accounted for 68 per cent. of the accidents.

Other violations of the laws as well as of common sense took a heavy toll. Failure to signal caused the deaths of 490 people, and accounted for the injuries of 48,928. More than 80,000 accidents resulted from motorists driving off the roadway. The biggest single cause of accidents, however, was the improper attempt to take the right-of-way from some other traveler—selfishness, hoggingness.

As might be expected, week-end driving is most hazardous. Sunday is the worst day by far, and Saturday is next.

There was a time when defective construction of cars, poor brakes, etc., were held responsible for most accidents. Today the fact has been well established that as drivers we are not so good as the cars we operate. Men have learned to operate ships at sea safely. The records of the railroads are marvellous. Where safety is the goal, airplanes have achieved miracles in protecting human life. In other words, we can operate high-powered, fast moving machines if we put our minds to it.

What we have to learn is that safety is more important than speed. Drivers must be made to realize that they are steering three or four thousand pounds of steel in swift momentum, the possible destructive power of which is enormous.

Safety is worth more than anything else. The maiming, and the killing, and the destruction of millions of property must be stopped and we, the average drivers, can do it.

La Grippe and "Flu" are Spreading

**"Flu" First Appears as a Sore Throat, but
Gains Tremendous Headway
in Six Hours**

AN EFFECTIVE TREATMENT DESCRIBED

Nearly every case of "Flu" starts with a simple cold. At first the throat is sore—often just a little hoarse—soon the infection goes lower—then the chest is affected. A safe plan is to gargle the throat three times daily with "Nerviline"—this will keep the throat free from germs. If there is any sign of tightness in the chest, rub on Nerviline—every drop penetrates deeply—congestion will be relieved—the cold will break up quickly. Many a dangerous case of "Flu" can be avoided by this simple home treatment.

Experienced mothers know how valuable Nerviline is for Coughs, Colds, Sore Throat, and the little ailments that arise in every family. Nerviline in most homes is called "Mother's Best Friend." 35c at all dealers.

World's Leading Flyer

**French Aviator Wins Award Holding
Five World Records**

Dieudonne Coste, Paris-to-New York flyer, has been designated the world's premier aviator by the awards committee of the International League of Aviators.

Miss Amy Johnson, who flew from London, England, to Australia, was given highest honors among women flyers. She and Coste were received at the Elysee Palace by President Doumergue and presented with silver cups at a formal ceremony.

Coste's only rival at the committee session was Wing Commander Charles Kingsford-Smith, the Australian "ace," and the Frenchman was chosen because he holds five world records in addition to the accomplishment of his Atlantic flight.

The committee also ordered plaques to be struck to honor Mrs. Victor Bruce, Maryse Bastie and Mrs. Charles Lindbergh.

Dr. Hugo Eckener was designated the world's premier dirigible pilot.

Magnesia Best for Your Indigestion

Most people who suffer, either occasionally or chronically from gas, sourness and indigestion, have now discontinued disagreeable diets, stomach tonics, medicines and artificial digestants, and instead, take a teaspoonful or four tablets of Bisurated Magnesia after meals with the result that their stomach no longer troubles them. They are able to eat as they please and they enjoy much better health. Those who use Bisurated Magnesia never dread the approach of meal time because they know this wonderful anti-acid and food corrective, which can be obtained from any good drug store, will instantly neutralize the stomach acidity, sweeten the stomach, prevent food fermentation, and make digestion easy. Try this plan yourself, but be certain to get Bisurated Magnesia especially prepared for stomach use.

Life Insurance More Popular

People Taking Advantage Of Attractive Policies Offered

One of the outstanding developments in the recent financial history of the United States is the remarkable growth of life insurance. The application of the principle of group life insurance to institutions and industries has made life insurance available to large numbers of persons who have never before carried any form of life insurance. The individual amounts of insurance in these cases are usually small, ranging from \$1,000 to \$5,000. But there has also been a marked increase in the number of large policies written. In 1923 there were 58 persons whose lives were insured for \$1,000,000 or more. In 1930 there were 323 persons carrying life insurance for that amount.—Wall Street Journal.

Miller's Worm Powders act so thoroughly that stomachic and intestinal worms pass from the child without being noticed and without inconvenience to the sufferer. They are painless and perfect in action, and at all times will be found a healthy medicine, strengthening the infantile stomach and maintaining it in vigorous operation, so that, besides being an effective vermifuge, they are tonical and health-giving in their effects.

Hatchery Approval Policy

**Big Saving To Canadian Farmers
This Year Is Forecast**

A saving to Canadian farmers this year of \$300,000 is forecast for the hatchery approval policy of the Department of Agriculture, according to the Minister, Hon. Robert Weir. Under the scheme, 134 hatcheries are operated, producing about 5,000,000 baby chicks a year, which are available to farmers at low prices. Records show these chicks to have a low mortality rate.

Drives Asthma Like Magic. The immediate help from Dr. J. D. Kellogg's Asthma Remedy seems like magic. Nevertheless it is only a natural remedy used in a natural way. The smoke or vapor, reaching the most remote passage of the affected tubes, brushes aside the trouble and opens a way for fresh air to enter. It is sold by dealers throughout the land.

More To the Point

Unusual Operation

**Piece Of Dental Plate Is Removed
From Lung Of Patient**

A piece of dental plate, measuring 1 1/4 inches by 1/2 inch and holding three teeth, was taken from the lung of Victor Brander, Cochrane lumber merchant, by Dr. S. B. McMillan, of the Lockwood Clinic in Toronto, after one of the most unusual operations in medical records.

Four months ago Brander was seized with a violent coughing spell, and, without knowing it, bit upon the metal dental plate. The broken portion passed down his throat and lodged in his lungs.

The bronchoscope, instrument used for retrieving objects from the lungs, was used and it took more than two hours of very delicate manipulation by the doctor before he was successful.

Came Back To Starting Point

Because the early Egyptian calendar allowed exactly 365 days to a year, a festival observed on a fixed date would occur one day earlier every four years, until in the course of 1,460 years it had been observed at every season and was back at the starting point.

Much Capital Invested

**Biscuit, Confectionary, Chocolate and
Cocoa Industries Have 281
Establishments**

According to the latest figures—those covering the year 1929—issued by the Dominion Bureau of Statistics, with reference to the biscuit, confectionary, chocolate and cocoa industries of Canada, the amount of capital invested that year was \$55,320,902; the number of persons employed, 13,073; salaries and wages amounted to \$12,765,876; cost of materials \$27,717,889, and value of products \$62,492,801. There are 281 establishments in all.

Felt Tired Out All Day

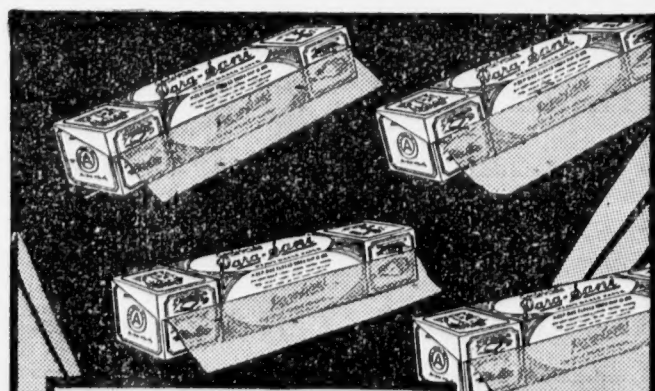

Could Not Sleep at Night

Mrs. Aldamond Lalonde, 2481 St. James St., Montreal, Que., writes:—"After a spell of the grippe I was left very nervous, and felt drowsy and tired out all day, and could not sleep at night. I was also troubled with my heart and did not feel at all like working. I was told about Milburn's Heart and Nerve Pills and after taking four boxes I was completely relieved of my trouble, and can recommend your Pills to everyone."

Greenhouse Grain At Ottawa Yields Two Crops A Year And Facilitates Research Work

About the end of April wheat harvesting will begin at the Canadian Government Experimental Farm at Ottawa—in greenhouses.

Greenhouse grain is essentially a novelty in Canadian farming practice, but it is one of the most important and significant developments of recent years in connection with cereal research. The cereal greenhouses were built in order to complete two years' research work in one year. During the hours of darkness and on dull days a powerful electric lighting system supplies the light essential to quick growth.

"We are two years ahead in our work since the new greenhouse went into operation—in other words, we know as much now about the varieties we are developing at the present time as we would have known under the old system in 1933," said L. H. Newman, Dominion Cerealist.

Some idea of the practical value of cereal research work through the two-crop-a-year system now possible is afforded by a contrast with what is now possible and the history of Marquis wheat. From eight to ten years of research prior to 1903 resulted in the development of the first head of Marquis bearing 60 kernels in that year. From that single head by 1918, a trade crop production of upwards of 300,000,000 bushels had developed. Had the cereal greenhouse been in operation during the preliminary development period, Marquis would have been ready for distribution to Canadian farms at least four years earlier, and this would have meant many millions of dollars to Canadian farmers during a period of bumper crops and record prices.

In the case of the crop which will soon be ready for harvest, the seed from field test plots harvested in the fall, was sown last October, and the seed from the greenhouse crops will be planted in field plots in May. The number and variety of individual types of grain which are developed in the greenhouse winter crop is really amazing.

Railroads Solve One Problem

Use Radio For Signalling On Long Freight Trains

Railroads, which have been trying to find a more suitable and reliable manner of instant communication between front and rear cars of long freight trains, other than the present method of signalling with the whistle, apparently have solved the problem by the development of a short wave radio apparatus.

Low powered telephone transmitters installed in both ends of a train will permit the flashing of orders instantly and also make possible communication with a moving train. The signalling apparatus consists of low powered short wave transmitting and receiving equipment adjusted so that the engineer or conductor desiring to signal or converse, need only depress a switch, which in turn automatically signals the trainman.

This development marks another utilization of radio possibilities and demonstrates how indefatigable are the rail carriers in experimenting with new devices in order further to improve their services and to protect their passengers.

Men, like tools, are useless when they lose their temper.

The Lesser Evil

"Leave off—leave off—I would rather you called the police."—Hummel, Hamburg.

W. N. U. 1881.

Over-Exercise Is Harmful

Too Much Is As Dangerous As Too Little

The recent toll of sudden deaths among business men while engaged in athletic games has focused attention to the problem of effect of exercise upon individuals past middle age. These incidents suggest some caution on the part of those past middle life who are in the habit of participating in games where more or less violent exertion is involved. Host of authorities agree that regular exercise virtually, up to extreme old age, is contributory to good health, but they also agree that discrimination is necessary to select the kind of exercise and the conditions under which it is taken.

Too much strenuous exercise is as dangerous as too little. However, most people can rely on their own judgment as to what is suitable for them in this respect. If they are unduly fatigued, as a result of their exertions, they may safely conclude that they are not in the right game for them. But the circumstance that some men have dropped dead while playing golf, curling, playing badminton, or bowling, should not result in a general avoidance of these games. It is a well known fact that by far the greatest majority die in bed. If an individual pays some attention to physical condition throughout his life he need only desist from fairly strenuous exercise when his doctor or the physical director advises him to do so. Moderate exercise is adding many years to the lives of a lot of people. It is the overdose that should be avoided.

Cut Flowers Popular

Canadians Spend Large Sums On Flowers and Decorative Plants

It is evident that Canadians have a predilection for cut flowers; in other words they believe in saying it with flowers, in whatever form the person may desire to express "It." For the year ended May 31, 1930, total of \$2,037,678 was spent in Canada for cut flowers, 71 per cent. of the total of \$2,879,041 spent for decorative plants, ornamental trees, shrubs, perennial and annual plants. In addition to the purchase of home-grown products of trees, plants, etc., Canada imported last year nearly 50,000,000 such products for purposes of beautification.

Advice to motorists — quit your skidding.

A train of thought runs regardless of time tables.

May Prove Very Useful

New "Electric Ear" Could Analyze Noises Of Cities

A portable "electric ear" to separate the various sounds of a whirling electric motor was demonstrated publicly recently at the Westinghouse Research Laboratories, East Pittsburgh, Pa., U.S.A., by J. P. Foltz, who developed it.

So compact that it fits into an ordinary suit case, this new "electric ear" can easily be taken to whatever sound may be under observation.

In line with the studies of various cities in an attempt to reduce the objectionable noise which, it is said, are gradually making nervous wrecks of the human race, the first step is to analyze the noise and find the parts which make it up.

"Noise is a queer phenomenon," said Mr. Foltz. "It is usually made up of various smaller noises and is seldom found in the pure state. When an apple is dropped on a wooden floor, the 'thud' which 'strikes' the human ear is made up of a great number of sounds having no more resemblance to the 'thud' than flour, milk, baking powder, butter and eggs have to a finished cake.

"When the apple hits the floor, the impact starts a series of complex 'broadcasts' which in physics are represented by waves, called sound waves. It is entirely possible to 'produce' silence by two sound waves which fit into each other much like the teeth of two saw blades.

"In a somewhat different application it is also hoped that in the future this new portable 'electric ear' may be used as an advance fault finder for aeroplane motors and propellers. So much more sensitive than the human ear, it is anticipated that it will hear loose wrist-pins, piston-rings, main bearings, warped or split propellers long before they are loud enough—and consequently dangerous—to be heard by the human ear."

Bird Sanctuaries In Canada

Protection Of Wild Life Has Proved Worth While

Conservation of wild birds in Canada was assumed by the government when there was still a good deal of unspoiled wilderness and few species were threatened with extinction, the New York Times points out. One naturalist is well known from coast to coast for his preserve where wild geese and ducks are fed and protected. In the Dominion there are more than forty bird sanctuaries. On the north shore of the Gulf of St. Lawrence there is a chain of ten islands where sea birds breed without molestation. A census taken in 1930 showed their number to be 100,836 of sixteen different species. This did not include "young birds hatched during that year." The increase since 1925 was estimated at nineteen per cent.

Many farmers in Japan are taking up weaving at home as a side issue.

Question Of Farming On A Large Scale As Against Survival Of Smaller Individual Farms

The past couple of years, with their glutted markets and low prices, have forced Canadians to give attention not only to their own farming methods, but to those of other countries. Russia and the Argentine have both entered the market which Canada had come to consider largely her own, and Canada is coming to realize that if she is to remain one of the major wheat-exporting countries of the world she must do something to reduce the cost of production. The United States, which has a home market for all but a relatively small fraction of its output, can, if it chooses, limit its crops and withdraw from the world wheat market altogether. Some have suggested that Canada do the same. But wheat bulks much more largely in Canada's production and in Canada's exports than it does in the exports and production of the United States, and it would be a far more difficult and far more serious thing for Canada to admit that she is beaten in the contest than for the United States to do this. Besides, Canada has advantages which the United States can not boast. She has cheaper land, she can grow larger crops, and she can grow wheat of a better quality.

Canada, for several reasons, must go on producing wheat in large quantities, and selling it abroad. She needs her wheat exports to balance or help balance the great quantities of goods she imports. She has organized herself as a wheat-producing wheat-exporting country, with elevators, railroads, docks and canals for the transportation of the product. And she has large areas of land which can not profitably be turned to any other purpose.

But necessities of the situation such as these are not going to solve the problem. Dr. W. W. Swanson, who was one of Mr. Bennett's expert advisors on wheat at the Imperial Conference, has estimated that the average cost of producing a bushel of wheat in western Canada is 78 cents. Number 1 Northern wheat sold on the Winnipeg Exchange recently, for less than 60 cents a bushel. A condition of affairs like that can go on for a year or two, but can not continue indefinitely. The farmer can only continue to produce wheat by producing at a profit. In the Argentine, wheat is produced on farms of great size by peons whose standard of living is low. In Russia, it is being produced on communized farms by people whose standard of living is also much lower than that which prevails in Canada. Russian wheat also has been forced upon the market at ruinous prices in order to create a credit to

meet Russian obligations. But that was a device to meet an emergency, and need not be expected to continue. Canada will, however, have to meet the low-priced Argentine and Russian grain on the world market. How can she do it?

Some men who have studied the situation, like Mr. H. E. Spencer, who represents Battle River in the House of Commons, believe western Canada must turn to large farms on the Russian scale—in other words, must industrialize farming. Others see no advantage in enlarging farms beyond the size which will give the maximum employment to the best type of modern machinery. Others again, like Hon. W. R. Motherwell, former minister of agriculture, are inclined to believe the small farm will survive. The economics of the situation will, of course, decide in the end. If the small farmer can not make a living, the small farmer will not remain. He will disappear, just as the small manufacturer has, to a large extent, given way to the great factory, and as the small shopkeeper is now retreating before the chain store, and the department store. But Canada, in her own interests, would do well to take what steps she can to save the small farmer from the fate which many believe is threatening him. The small farmer is the foundation on which this country rests. Capitalist and laborer in one, he is industrious, frugal and independent, and we can ill afford either to allow his standard of living to be reduced, or to turn him to a mere workman on a large wheat-growing estate. There is probably not very much danger that Communist ideas will prevail on this continent. But the principal bulwark against them is the small farmer who owns his own land and is his own boss and can see no advantage in the socialization of either his property or his labor. — Vancouver Province.

Canadian Poultry For Africa

Shipment From Nanaimo, B.C., Going To Natal

"It's a long way to Mooi River," crowed six frisky white leghorn cockerels on the railway platform at Nanaimo recently. It was their first transfer on a 50-day journey from the farm at Westholme, Vancouver Island, where they were raised. They were bound for Vancouver and across Canada to Saint John, New Brunswick, from where they will be shipped to Durban, South Africa. At Durban they will be trans-shipped on the government railway to Mooi River, Natal, where they will take up permanent residence. The birds are to provide a change of blood and to be used for foundation purposes by a Natal poultryman. Shipments of poultry from the same farm have recently been made to the British Isles, the Orient, Hawaii, several parts of Canada, and the United States.

Canadian Tree Seed For Britain

The Forestry Commission of Great Britain is using Canadian Sitka spruce seed to a considerable extent in the planting of new forests in that country. The total quantity of seed of this species sent to Great Britain up to date by the Forest Service, Department of the Interior, is over eleven thousand pounds (five and a half tons). This seed has all been extracted at the seed-extraction plant of the Forest Service at New Westminster, B.C.

Food Merchant: "I have found a substitute for fish. Tastes the same and smells even more unpleasant after three days."—Dorfbartier, Berlin.

FESTIVAL OF ENGLISH DRAMA

Malvern, Worcestershire, England. Here, in the beautiful west country town, hard against the Welsh border, will be staged from August 3 to 22, inclusive, the annual festival of English drama. To George Bernard Shaw (right), world-famed author and playwright, will be dedicated the 1931 festival. Sir Barry Jackson (left), British millionaire and theatrical producer, is directing the event, which will include a new play by Shaw. From the Malvern Hills long ago, a beacon told twelve counties of the approach of the Spanish Armada.

SUNDAY SCHOOL LESSON

MARCH 22

THE USE AND ABUSE OF GOD'S GIFTS—TEMPERANCE LESSON

Golden Text: "Be not drunken with wine, wherein is riot, but be filled with the Spirit."—Ephesians 5:18.
Lesson: Luke 12.
Devotional Reading: Matthew 6:19-24.

Explanations and Comments

The Warning Against Covetousness, verses 13-21.—A certain rich man, so the parable of Jesus begins, whose fields yielded more than his barns would hold, propounded to himself this query, "What shall I do because I have not where to bestow my fruits?"

"God has provided barns for superfluous corn in mouths that hunger, limbs that shiver, homes where the orphaned and the widowed sit in want. To store in these treasure-houses is the luxury as well as the duty of wealth."

The rich man proceeded to answer his query: "This will I do: I will pull down my barns, and build greater. And I will say to my soul [some one observes that he was talking to his stomach under the impression that he was addressing his soul], Soul, thou hast much good laid up for many years; take thine ease, eat, drink, be merry." "He does not say to it, 'Now, my soul, let us study art, and music, and literature.' The finer instincts have gone; his feeling for God, his enthusiasm for humanity. He has so lived that at the end of his years he has lost the capacity to live. He has made a living and unmade a life."—J. H. Jowett.

"It is a shameful conception of wealth which regards it only as a means to ease and luxurious living. The ease it brings is, or should be, only the reward for the heavy responsibilities it imposes. The man who is rich by reason of the great business interests he has built up is accountable to the community for the honesty and usefulness of his service, to his hundreds of thousands of employees for such a conduct of the business as will assure them of their means of livelihood, to his own conscience for laborious and unremitting attention to the wearisome details of business management. Too often the loss of leisure, health, and happiness is the penalty he pays for the luxuries he enjoys."

"The rich fool made three mistakes: he mistook his body for his soul; he mistook time for eternity; and he mistook himself for God, the Ruler of all destinies."—James Orr.

God said unto him, "Thou foolish one, this night is thy soul required of thee; and the things which thou hast prepared, whose shall they be?"
The Parable Of Faithful and Unfaithful Servants, verses 35-40.—Watch eagerly for the coming of the King, like servants of a lord who, with loins girt for service, and with lamps burning, await his coming in the night time. "In the spiritual sphere the loins girt point to a noble purpose in life, and the burning lamp to the spirit of hope." When the master finds them watching, he in his joy will himself take the place of a servant, make them sit down, and serve them. Blessed is that master who finds them watching in the second or in the third watch—the time when men are most liable to give way to sleep. Then Jesus used a new figure, that of a master of the house on his guard against the coming of a thief at an unexpected time. And the conclusion of the parable is: "Be ye also ready; for in an hour that ye think not, the Son of Man cometh."

Douglas' Egyptian Liniment is an excellent leg wash for stock. Also removes corns in horses and quickly relieves bruises, sprains, swellings and joint stiffness.

Manufacturing In the West

Figures Would Indicate Phenomenal Development Within Recent Years

J. M. Davidson, managing secretary of the Industrial Development Board of Manitoba, pointed out in the course of an address in Montreal recently, that industrial production in Alberta exceeds \$100,000,000 annually; in Saskatchewan, \$60,000,000 and in Manitoba, \$165,000,000. There are \$16,330,000 more capital invested in Manitoba's manufacturing industries, he added, than in all the livestock, poultry, implements and machinery in the province, and Manitoba's manufacturing output last year was more than double the combined western returns from dairy products, field crops (exclusive of grain), poultry and honey.

MAGIC

MENU

Look for this mark on every tin. It is a guarantee that Magic does not contain alum or any harmful ingredient.

Try Miss Caldwell's Recipe for *RASPBERRY BISCUITS

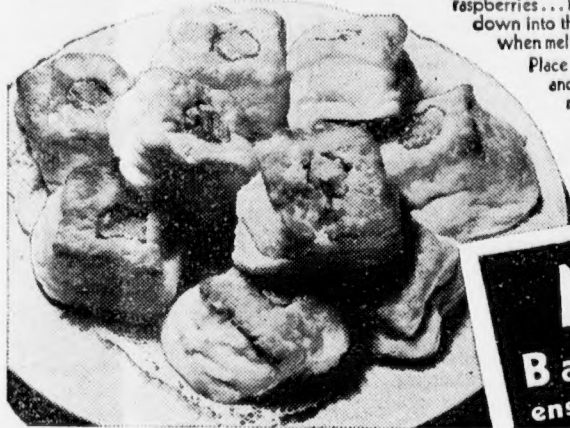

2 cups flour
4 teaspoons Magic Baking Powder
3/4 teaspoon salt
2 tablespoons sugar

4 tablespoons shortening
3/4 cup milk
Tea-cubes of sugar
Raspberry juice or syrup

Mix and sift the dry ingredients. Cut the hard, cold shortening into them with a knife, using a quick, short, chopping motion; or reduce the hard cold fat to tiny particles with a pastry blender or a steel-pronged fork. When the mixture resembles a very coarse meal, add the liquid, mixing quickly and lightly. Turn out the dough on a slightly floured board; pat it down lightly or roll it to a thickness of about one inch. Shape with a small cutter or cut in squares with a floured knife. Dip the small lumps of sugar into syrup from canned or fresh raspberries. Press a lump into each biscuit. Pressing it well down into the dough so that it will not run down the sides when melted.

Place the biscuits on a greased pan or baking sheet and bake in a very hot oven, 450° F., 12 to 15 minutes.

Does Not Appear Weak

Lightning Strikes Which Split Great Rocks Compel Respect

A 5,000,000-volt stroke of lightning having been caught and measured on an electric line in Arkansas, the scientists state that it is considerably weaker than machine-produced electricity.

This conclusion may satisfy electricians of note, but the ordinary man should beware of trifling with lightning when it is raging about. Strokes that split great rocks, hit and raze big buildings and wipe out herds of cattle, are quite capable of disposing of a mere man in astonishingly quick order.

Lightning is a natural force that compels respect.

Persian Balm—the peerless aid to loveliness. Delightfully fragrant. Dainty to use. Leaves no stickiness. A little gentle rubbing and it is swiftly absorbed by the tissues. Tonic in effect. Soothes and dispels roughness and chafing. Keeps skins soft and velvet-textured. Unrivalled for charm, distinction and refinement. Used by lovely women everywhere to preserve and enhance their natural beauty.

Doctors Donate Millions

Investigations show that the medical men in the United States give away a sum of \$365,000,000 annually by donating their services to people who cannot or do not pay. On this basis of reckoning the medical fraternity in Canada must be giving away annually some \$30,000,000. Their critics have no such record of philanthropy to show.

Aching CORNS STOP HURTING INSTANT RELIEF!

Just a drop or two of Putnam's Corn Extractor, and the pain goes away. Relief is almost instantaneous. Removing corns with "Putnam's" is so easy, so sure, so painless—thousands use this wonderful remedy, and say it is the best. Don't suffer any longer, use Putnam's Corn Extractor, the one sure relief for sore corns. Sold at every drug store, 35c.

PUTNAM'S

Atmosphere Of Earth

Hundred Miles Deep

But Sun Has Atmosphere Depth Of 9,000 Miles

New discoveries about the sun's atmosphere have been disclosed to Dr. Albert Einstein at the Mount Wilson Solar Observatory, Pasadena, California, by Dr. Charles E. St. John, of the Carnegie Institution, of Washington. The sun's atmosphere is 9,000 miles deep, compared with the 100 mile depth of the earth's atmosphere. The outermost layer of the earth's atmosphere is composed of the lightest gases, helium and hydrogen. The sun's atmosphere is quite different, the outermost layer being of ionized calcium, forty times heavier than the layer of hydrogen 3,000 miles closer to the sun.

In the earth's atmosphere the first seven miles from the earth form a layer in which wind storms occur up to a velocity of 200 miles per hour. At 35 miles up argon, one of the constituents of air, disappears. Farther up there is no more oxygen, and at 70 miles nitrogen disappears, leaving only helium and hydrogen for the last thirty miles.

For Both House and Stable.—There is a good deal of similarity, physically speaking, between human beings and the lower animals. Both are subject to many ailments arising from inflammation and to all manner of cuts and bruises. Dr. Thomas' Electric Oil is an entirely reliable remedy for such ailments and mishaps in both human beings and the lower orders of animals.

An Ever-Present Menace

Carbon Monoxide Gas Most Treacherous Because No Warning Given

A recent bulletin issued by the Roads Department of the Province of Quebec, contains an important reference to the danger created by the presence of carbon monoxide, a menace all the greater because it may extend even to an automobile in motion. The note is well worth careful perusal by all motor drivers. Carbon monoxide is a colorless, tasteless, practically odorless gas, and is without any irritant action on the mucosa of the respiratory tract. Because of these properties, it is impossible to detect it by any of the five senses. It is, therefore, a most treacherous gas, since it can be present in dangerous quantities without giving any warning whatever.

Britain expects a record pleasure-boating season this year.

To Speed Up Traffic

Horses Banned From London Street During Certain Hours

For the first time in the history of London, horse traffic is to be forbidden to one of the city's principal streets.

The ministry of transport has announced an experimental scheme operative during the coming spring by which Oxford Street, one of the great east and west thoroughfares, will be closed daily to all slow moving traffic, including horse-drawn vehicles, between noon and 7 p.m.

POOL ELEVATOR PROBE IS ASKED FOR MANITOBA

Winnipeg, Man. — Charges that Manitoba Wheat Pool elevators deprived their farmer-shareholders of "enormous sums" through overages and under-grading may be probed by the provincial government.

Premier John Bracken had before him for consideration two requests for the appointment of a royal commission to inquire into the operation of the Pool elevators. One was from J. R. Murray, vice-president of the Alberta Pacific Grain Company, Limited, the other was delivered from Colin H. Burnell, president of the Manitoba Wheat Pool.

With both the accused and accuser demanding a governmental investigation, it seemed certain that a commission would be appointed, although grain authorities here thought the premier might wait action of the Dominion government which, it has been rumored, soon will appoint commissioners to conduct a probe into grain marketing.

Premier Bracken refused comment on the letters. He said the government must have time to study the texts before announcing the stand to be taken. "I have nothing to say at present," he told newspaper interviewers.

"That should be satisfactory," said Mr. Murray, when advised that the president of the co-operative organization had requested a commission of investigation. "My charges are not an attack on the Pool by the grain trade," he said. "I sought the probe on my own responsibility, in the interests of my many good friends among the farmers."

Mr. Burnell branded the charges of "extravagantly high expenses," etc., "absolutely false" in his letter to the premier, and urged that a commission be appointed "as soon as possible," to probe the allegations.

In a letter to Mr. Bracken, Mr. Murray made his charges against the Pool elevators operation, and urged a government inquiry. He charged that farmers were "inveigled" into becoming shareholders in Pool elevators, had been deprived of large sums through overages and under-grading to meet "extravagantly high expenses" and that the latter had been concealed from shareholders by "book-keeping devices."

The letter from Mr. Burnell to the premier reads: "I have seen in the press a letter from Mr. Murray, former manager of the United Grain Growers, in which he charges the Manitoba Pool elevators with practices which by inference are equivalent to the deliberate cheating of the members of the Pool elevator associations, and he demands you to institute an investigation into Manitoba Pool Elevators, Limited."

"These charges are absolutely false, and I am instructed by the board of directors of the Manitoba Pool Elevators, Limited, acting on behalf of the members and patrons of the local Pool elevator situation, to request you to have a commission appointed to fully investigate the above mentioned charges as soon as possible."

Canadian Dollar Above Par

Second High Quotation In New York This Year

New York.—The Canadian dollar slid above par March 11, for the second time this year, being quoted in the money market here at 1.64 of one per cent premium.

The strength of Canadian funds has been attributed to Canadian financing in the local market and bankers attribute the gain to placing of an issue of \$11,070,000 City of Montreal gold bonds.

No Change Contemplated

Washington, D.C.—It was officially stated that President Hoover is contemplating no change in relations between the United States and Russia. Secretary of State Henry L. Stimson, is planning a study of the Russian situation and this has led to rumors a change in the relations between the two countries was contemplated.

W. N. U. 1881

To Assist Farmers

Government Grants For Promotion Of Cattle Raising

Ottawa, Ont.—Government grants for the promotion of cattle raising in Western Canada were announced by Hon. Robert Weir, Minister of Agriculture. With a view to assisting farmers to establish themselves in the breeding of cattle for either beef or dairy purposes, the government will pay freight charges on carload lots of accredited stock from Eastern Canada.

Freight charges will be refunded, Mr. Weir stated, providing the consignee forwards to the acting livestock commissioner at Ottawa the receipted freight bill and a formal statement showing that conditions attached to the grants have been complied with. In order to benefit, the purchaser must show that the carload consisted of at least 12 head of female cattle, not under eight months and not over five years of age.

Only cattle that have been declared by a Dominion veterinarian to be free from tuberculosis or other disease may be included in a shipment and the animals must be shown to be of merit from a producing standpoint. The new policy goes into effect immediately.

Railway Asking Fifty Million Stock Issue

C.P.R. Has Forwarded Official Notice To Shareholders

Montreal, Que.—At the 50th annual meeting of the Canadian Pacific Railway, to be held here May 6, authorization will be asked for an issue of \$50,000,000 ordinary capital stock, in amounts, on such terms, and at such times as the directors shall decide. Official notice to this effect has been forwarded to the shareholders.

Toronto, Ont.—"While no direct explanation was forthcoming to explain why the Canadian Pacific should require an additional \$50,000,000, if approved, it is generally understood that it indicates a continuation of the company's expansion programme," the Mail and Empire says.

"It has been known for some time that the Canadian Pacific plans expansion of its rail service through the Canada west," the newspaper continued.

Many Assisted Under Joint Relief Scheme

Labor Minister Issues Statement On Work Given Unemployed

Ottawa, Ont. — The joint Dominion-provincial unemployment relief scheme which came into operation last September, has provided work for at least 231,351 persons, Senator G. D. Robertson said in a press release. This figure did not include the total for Quebec province but did include the number of men given work through special efforts of the Canadian National and Canadian Pacific Railways.

The reports from Saskatchewan indicate that the total number of men given employment was 19,554 up to February 28, 379,174 man-days work having been provided. In addition 14,151 individuals were given direct relief.

Animal's Paradise

Washington, D.C.—All the caribou in the United States—400 head—will be government charges when Isle Royale, in Lake Superior, becomes a national park. They are there now, along with 2,000 moose and sundry beaver and deer. Isle Royale is an animal's paradise with 56,000 acres in which to roam.

Air Company Organized

Winnipeg, Man.—Primarily for the transportation of miners and supplies to the new mining areas of Great Bear Lake and Copper Mine River, in the Northwest Territories, a new Canadian aviation company, with capital of \$160,000 and a fleet of six planes, has been organized.

Will Hold Investigation

Montreal, Que.—Securities protective committee has been formed, under the chairmanship of Hon. Charles A. Dunning, to "study the whole Canada power and paper situation in the interests of the security holders," states an announcement issued here.

WILL GO TO LABRADOR

Miss Doris L. Feltham, of Springfield, Mass., who will start for Labrador, in May, to teach the women of that land how to preserve the few fruits and vegetables that can be grown in the span of two months, for use during the long cold winter. Summer comes to Labrador for a brief two months to move on again before the onslaught of Arctic winter. Miss Feltham, a graduate of Massachusetts Agricultural College, will work under the banner of the Grenfell Missions.

Woollen Mill Owners Are Visiting Canada

Better Business Relations Being Sought By Scotch Manufacturers

New York.—Four representatives of woollen manufacturers of Scotland arrived here on the liner "Olympic" on their way to Canada for the purpose of promoting better business relations with the Dominions. There was a possibility they would discuss arrangements for establishing branches of representative firms in Canada. They will also visit throughout the United States. Their Canadian itinerary will include Vancouver, Winnipeg, Toronto and Montreal.

French Envoy For Ottawa

Ottawa, Ont.—Once again France is represented in Canada by her own minister. Charles Arsene Henry, minister plenipotentiary to Canada of France, accompanied by Madame Henry, has arrived in Ottawa from New York. At Montreal M. Henry said he thought France would prove a good market for Canadian wheat as she has not committed herself to relegated purchases from European countries.

For Empire Trade

London, England.—The erection of Empire Marketing Board poster frames in Canada to demonstrate work being done by the board in promotion of the sale of British products in Britain is being considered by the government, Rt. Hon. J. H. Thomas, secretary for Dominion affairs, stated.

Work For Unemployed

Says More Relief Money Earned In Manitoba Than Any Other Western Province

Winnipeg, Man.—Hon. W. R. Clubb, director of relief projects, replied to Conservative charges that Dominion government money had been withheld from unemployed in Manitoba with an assertion that more unemployment relief money had been earned in Manitoba than any other western province. He told the legislature that projects financed jointly by the Dominion, province and municipalities had been started promptly last fall and would be continued in the spring.

This province, said Mr. Clubb, had led the way in providing jobs for the out-of-work. Instead of money being withheld, it had been paid out in late fall and winter construction. More would go to men now out of jobs when some of the largest projects were started in the spring.

By using Dominion Government relief money in constructing Manitoba's link of the trans-Canada highway, Mr. Clubb said more men had been employed than if the province had done the work alone. A "wider and better" road would be the result, he added.

Wheat Exports Increase

Heavier Volume Is Shown During Past Seven Months Than Corresponding Period Last Year

Ottawa, Ont.—Wheat is moving freely through export channels, according to a report issued by the Dominion Bureau of Statistics. During the seven months ended February 28, exports totalled 148,594,000 bushels, as against 88,420,000 bushels in the corresponding period a year ago. Shipments of Canadian wheat from United States ports are not included.

Despite the heavier volume, lower wheat prices kept the total value down, the figure being \$111,725,000, as compared with \$117,429,000. Of the total, 90,746,000 bushels went to the United Kingdom, 7,722,000 bushels to the United States, and 50,125,000 to other countries.

Arranging New Mail Service

Sea and Air Service Will Soon Be Connected

London, England.—As soon as the connecting air service is available, letters prepaid for air transmission, will be carried by sea from Great Britain to Belle Isle and thence taken by air to Montreal and beyond, the assistant postmaster-general S. P. Iviatt, announced in the House of Commons.

Arrangements to this effect have been completed with the Canadian authorities, and the date of the opening of the service and the fees to be charged will be announced in due course.

NAVAL ACCORD IS MADE PUBLIC IN LONDON

London, England.—Limitation of French and Italian naval programs until 1936 is definitely laid down in the terms of the British-Franco-Italian naval accord, made public recently.

But even more important than its technical provisions in the opinion of the three governments concerned, the agreement brings European peace measurably closer and provides a point of departure for the disarmament conference at Geneva next year.

The accord covers building programmes for battleships, cruisers, aircraft-carriers and submarines, in substance as follows:

Battleships—Both France and Italy are given the right to complete before December, 1936, two capital ships whose displacement shall not exceed 23,333 tons, and whose gun calibre shall not exceed 12 inches.

Cruisers—Both nations agree that after completion of the 1930 class they will build no more big cruisers with armament larger than six-inch guns. In the small cruiser category they agree that tonnage of new construction to be completed shall not exceed the tonnage which is replaceable in this category before December 31, 1936.

Aircraft-carriers—Each nation may build 34,000 tons in this category.

Submarines—Both countries agree not to include any submarines in the 1931 programme, and not to lay down any further submarine tonnage before 1933.

Essence of the agreement is maintenance of the status quo in tonnage ratios, France retaining an estimated superiority of 150,000 tons.

The terms were made public here in the form of a memorandum to parliament by Rt. Hon. Arthur Henderson, British Foreign Secretary, and Rt. Hon. A. V. Alexander, First Lord of the Admiralty, who achieved the agreement in conferences with representatives of France and Italy.

Gasoline Prices Reduced

Cut Is Announced In Prices For Eastern Canada

Montreal, Que.—Gasoline prices in Ontario, Quebec and the Maritime provinces were reduced this morning.

The reductions follow: Toronto, the Island of Montreal, and principal cities in Western Ontario, 2½ cents per gallon; elsewhere in the provinces of Quebec and Ontario, 1½ cents per gallon; Maritime provinces, one-half cent per gallon.

The changes were announced by John Irwin, president of McColl-Fontenac Oil Company, who said all refiners had decided on the changes. It was the second downward revision of prices in about a month, and followed the establishment by the Ottawa Government of a 2½ cents protective tariff on the products of Canadian oil refineries.

Rules Of Living

Gandhi Gives Four Commandments To His Followers

Ahmadabad, India. — Mahatma Gandhi gave four commandments to his followers recently.

When they asked him what their conduct should be he replied:

"Don't tell lies."

"Don't use abusive language."

"Don't smoke."

"Don't eat sweets."

A youth asked plaintively, "How about tea?" and Gandhi replied with a broad smile, "You may drink tea. Drink it from the River Sabarmati." The Sabarmati is the holy river of Gujerat.

Grandson Of Jules Verne

Havre, France.—Jean Jules Verne, whose grandfather wrote "Twenty Thousand Leagues Under the Sea," has sailed for New York on the liner "Lafayette," to be a guest at the launching of the submarine "Nautilus," in which Sir Hubert Wilkins plans an undersea expedition to the North Pole. Verne is a police magistrate in Rouen.

CANADA'S NEW GOVERNOR-GENERAL

Here are shown Earl and Countess of Bessborough. The Earl of Bessborough has been appointed the new Governor-General of Canada in succession to Lord Willingdon. Widely experienced in parliamentary and financial affairs, Earl of Bessborough is now 51 years of age. The Countess is the daughter of Baron de Neufville of Paris. They have a son and daughter.

**GEORGE BEVINGTON'S
RELIEF MEASURE**

In speaking at a meeting in Carbon
a few days ago, George Bevington
proposed a plan whereby the Dominion
Government would take over the 1930
wheat crop held by farmers and in
return give them "wheat certificates"
in payment of this wheat at approxi-
mately the cost of production.

In our opinion Mr. Bevington's plan
of relief is not as far fetched as some
suppose, but it is one way in which
to tide things over until conditions
better in Canada, and a mighty good
way.

Mr. Bevington's proposed Wheat
certificates would be issued by the
Government of Canada to any farmer
having wheat to sell. The farmer
could haul his wheat to the elevator
and receive a special paper bill or

money called a wheat certificate and
instead of getting 38c a bushel for his
wheat he would probably get \$1 wheat
certificate, or the cost of production.
This wheat certificate would be as
good as the Canadian dollar and back-
ed by the Government of Canada in
wheat. The grower would not lose a
cent because he would get what it
cost him to produce this wheat; the
Government would not lose, because
it costs them nothing to issue these
notes (except the cost of printing) and
they have wheat to give any one hold-
ing these certificates, should he de-
mand payment. Should these certifi-
cates get to other countries it would
be all the better. The note would be
paid in wheat and thus reduce the
wheat surplus in Canada to that ex-
tent.

Speaking above of the wheat certi-
ficates not costing the Government of
Canada a cent except the cost of the
printing, proof of this comes from
our war time history. During the
Great War the Federal Government
took over two bankrupt railroads, the
C.N.R. and the G.T.P. and issued di-
rect to the owners a total of sixteen
million dollars in Canadian currency.
About this time Canada also issued
ten million more Canadian dollars to
meet certain obligations, yet on these
occasions the value of the Canadian
dollar was not reduced by the infla-
tion of the Dominion currency to the
extent of twenty-six million dollars.
Again, proof for this is that the Cana-
dian dollar is issued on the Natural
Resources of the country, and not on
the gold supply, as is generally thought
to be the case.

Dr. Bevington explained that this
wheat certificate system was by no
means a remedy for our financial con-
dition, but it would be a means of
getting through the present crisis
without creating more debt in doing
so.

We believe that Mr. Bevington's
"Wheat Certificate Plan" to be sound
all the way through and should such
a remedy be able to be brought about
by the Government of Canada, the

VICTORIA EVERGREEN PLAYGROUND

Victoria, Canada's evergreen playground, offers a striking contrast
to the rest of the Dominion during the winter months, for while all
other parts of the country are blanketed in snow, summer never
really loses its domination there. The climate is so mild that all kinds
of sports, usually subject to seasonal limitations elsewhere in Canada
are all-the-year-round recreation, and the beautiful setting of Vancouver
Island never loses its charm. Victoria is essentially beautiful, as the
accompanying pictures show: (1) The Empress Hotel, the Canadian
Pacific Railway's imposing hostelry, headquarters of all social and
sporting events and Mecca of thousands who wish to escape the rigors
of the prairie winter. (2) The "gallery" at the Crystal Gardens, watch-
ing. (3) Bathers in its swimming pool. (4) Butchart's Gardens, once
a quarry, but now one of the finest gardens in the world. (5) The
famous Malahat Drive, winding for miles through beautiful mountains,
and (6) A golfer, driving off at the 7th. tee.

**DISPLAY OF WORK AND
CLOSING EXERCISES AT
OLDS SCHOOL AGRICULTURE**

A display of students work at the
Olde School of Agriculture has been
arranged for the afternoon of Satur-
day, March 21st. Articles that have

been made by students in both the
Domestic Science and Agricultural
courses will be assembled in order
that students, parents and friends may
view some of the work which has been
accomplished in the practical exercises
at the school.

The closing exercises of the School
which will be held on Wednesday,
April 1st, mark the closing of the five
months school year. Diplomas will be
presented to the young men who have

successfully completed their two year
course in Agriculture and to the young
ladies who have completed their
course in Domestic science. The prizes
and scholarships will be awarded and
addresses will be delivered by leading
public men.

Both the exhibition of work and the
closing exercises are open to the public.

WE can never be sure just what makes a child restless, but the remedy can always be the same. Good old Castoria! There's comfort in every drop of this pure vegetable preparation, and not the slightest harm in its frequent use. As often as your child has a fretful spell, is feverish, or cries and can't sleep, let Castoria soothe and quiet him. Sometimes it's a touch of colic. Sometimes constipation. Or diarrhea—a condition that should always be checked without delay. Just keep Castoria handy, and give it promptly. Relief will follow very promptly; if it doesn't, you should call a physician.

CHAPTER XII.—Continued.

"I do," said Sonny suddenly. "I'll bake you an over pie if you want one." Halliday laughed, and arose.

"I rather think my digestion won't stand for it," he replied. "And besides, I must go home and get ready for my guest. I'll come back later and find out what you hear from the nurse, Mrs. Hastings. Just now Julie's waiting for my orders. It's fine to see this man of yours about again, isn't it?"

He turned away, while Sonny slid down the steps to join him, slipping his little hand into James Halliday's as confidently as he would have put it into Nick's.

"I got a oven where I bake 'em," he said sociably. "Daddy made it. Daddy can make anything. I'll show you 'fore you go home."

"Gay," murmured Nick softly, "you ought to have seen Halliday's face when the kid offered him that pie! I don't believe he ever played in his life—or if he did he's forgotten how. But it's fine of him to do so much for that little girl."

Gay didn't answer. She was watching James Halliday bending above the pile of stones that was Sonny's oven. In the silence she heard her lit-

tle boy explaining: "You put 'em there first, an' then brown 'em on the tops, same as Mummy does, only me can't have matches. Daddy says mud pies don't need matches. He says they're sun-baked, an' the flavor's more 'licious that-a-way. Some day when you got time I'll let you make one."

"Thanks," said James Halliday. "When my little girl gets better perhaps you'll teach her how to do it. I must go now. I enjoyed my refreshments very much."

"It wasn't 'freshments," corrected Sonny soberly. "It was pie. 'Freshments is ice cream."

Halliday laughed. "I see. I'll try not to make such a mistake again. Good-bye, little chap."

"By," said Sonny, and turned once more to his absorbing task.

Gay watched James Halliday go through the garden and into his own house.

"His little girl!" she exclaimed softly. "Did you hear that, Nick? Oh, wouldn't it be wonderful if—"

Nick smiled, and said: "My dear girl, have you forgotten the Hallidays' careers?"

"Careers!" echoed Gay with scorn. She arose, and moved toward the door. "I must go in and telephone that nurse. I tell you what, Nick Hastings, it's some career just keeping a family going! And if the Hallidays should keep that little girl—"

"You're an incurable day-dreamer," said Nick. "I'm glad you are; but—but somehow I can't just see Mrs. Halliday adopting a child. She's rather keen on the subject of inheritance, and all that. I had the feeling that day, that she thought I'd been foolish to try to save something that was, possibly, not worth saving. Was she right, Gay? I've been wondering—"

"There!" broke in Gay indignantly. "I knew someone had put that idea into your head, because such thoughts aren't really yours. Just get rid of them, my dear. They don't belong to you. Why, Nick! even the least of us has the right to life—and how can you or I, or Mrs. Halliday, know what that little girl may have to give the world?"

Her eyes met his, and in one glance swept away the seeds of Angela Halliday's careful sowing.

"You're right, of course, dear," he said quietly. "You always are right, Gay. I believe you see more true and straight than most of us; and yet—it's queer, but I felt as you do until she talked to me about it. Don't stay too long at that telephone. I want you."

"You're getting spoiled," she answered, brushing back his hair with a tender hand. "I'm neglecting everything."

"That doesn't matter," said Nick, smiling up at her, "so long as you don't neglect me. I shall continue to boss the roost while you keep me in this chair. I like being spoiled."

"I'm afraid," said Gay, with a quiet little laugh, "that I like spoiling you!"

CHAPTER XIII

The summer was waning, and after three weeks at "The Bird's Nest," where he regained the last of his diminished strength, Nick was back in the cage.

Five Boys—

Best Evidence.

Mrs. Corcoran, of Leigh, writes:—"I suffered with biliousness accompanied by sick headaches for days at a time, and every medicine I tried failed to bring relief. A friend gave me some of your wonderful Carter's Little Liver Pills and the first dose gave me great relief. For three years I have taken them every night as a regulator and I find they prevent these bilious and sick headache attacks. I have five little boys and I give them three or four every week. I have great faith in them." Take Carter's Little Liver Pills. All druggists 25¢ and 75¢ red pkgs.

"It seems good to have him there," said John Maxwell to Mary, at the close of Nick's first day, "and I believe the boy is happy to be back, possibly because we were all so glad to see him."

"I met Gay down town, too," said Mary Maxwell. "She looked rested, and pretty, and wore a smart little new gown that was tremendously becoming. I was surprised to see it. Their bills must have been overwhelming these last few months."

"Possibly the dress was a gift." "From whom? There's not a soul who'd think of such a thing. The truth is, Johnny, I've sometimes longed to give her a gown or two myself, but I thought she might not like it. She and Janey were always so much together that I've hated to think that Gay was going without the pretties a young girl wants—and she's still a girl, you know, in spite of her little family."

"I think you might give her something now and then, Mary. Gay's not the sort who would take offense. Can't you pretend you got them for yourself and they were—well—too small or something?"

Mary Maxwell glanced down at her generous proportions, and smiled at her husband's naive suggestion.

"I fear, my dear, that Gay would see through a subterfuge like that. Johnny, do you suppose old Mr. Bartlett gives her anything?"

"It wouldn't surprise me; though clothes are the last item he would notice."

"I don't know. Those days he was here with the babies he noticed everything. He's a wonderful old man. I wish he'd give Gay an allowance."

"Well, I don't," John Maxwell spoke with decision. "There's nothing better for a man than having to scratch gravel to provide for his wife and children. In my opinion Nick's marriage has been the making of him. Not that he wasn't all right before; but he needed ballast, and Gay provides that in just the right amount. I shouldn't want Simeon Bartlett to do too much for them."

"Well," sighed Mary, with a thought for the days when she herself had longed for the unattainable, "I suppose you're right, and possibly Mr. Bartlett agrees with you. I feel sure there's nothing he wouldn't do for them if he thought best."

This was true. It sometimes tore Simeon's heart not to lift all Gay's financial burdens. Only his shrewd good sense kept him from doing it. He had, however, taken care of the bills incurred by Nick's illness, saying when Gay protested, "It's only a loan, dearie. Better owe me than the doctor. He needs it more'n I do; and Nick can pay me back any time it comes handy."

"But I've the hundred dollars you gave me, Uncle Sim. That'll pay some of it. I can't go into debt to anyone, you know, and spend the money for silly clothes."

"I ain't askin' you to spend it for silly clothes, dearie. Clothes ain't silly if they make a woman look right to her man. It ain't often I give a present and tell folks just what they got to do with it. That ain't no way to give; but this is different. Run along now, and do your shoppin'. If you don't, I'll do it for you, and there's no knowin' what outrageous flim-flams I might buy."

Hence the smart little gown that

had caught Mary Maxwell's approving eye, and which also caught Nick's when Gay appeared at the bank that afternoon.

"Where'd you get it?" he questioned through his little window, for once unmindful of the fact that Sonny was begging for admittance. "You look a peach. I bet you've overdrawn our account—and I don't care a darn if you have. If there weren't so many people round here I'd—"

"No love making allowed in banking hours," came from the next cage, as Johnny Symmes caught the drift of Nick's remarks. "How do you manage to get him going like that after all these years, Gay?"

Gay laughed. "The recipe's simple. Get a new gown and spring it on your man unexpectedly. You tell that to Flora."

"Nothin' doin'," said Johnny, smiling broadly. "Flora doesn't need any urging to buy new gowns. Run along, Gay. We need the services of our paying teller, and he's still spellbound. Not that I blame him. You look a regular corker this afternoon."

(To Be Continued.)

Soviet Farm Movement

Development Of Farms To Be Intensified In Russia

Soviet Russia is going "back to the farm," according to figures just issued by the government. During the last ten days in January and the first ten in February, a total of 726,000 families joined the collective farms, the figures show. This migration is the greatest in history. Development of these farms has always been the backbone of the Soviet movement.

Most of the families who have applied to join the movement came from the Ukrainian Republic, the North Caucasus, the upper and lower Volga and the German republic. They were expected to move to the farms gradually during the spring in time to get next season's crops planted.

"Stop" Signals For Speakers

Automatic signals of the type familiar to motorists were used to flash a warning to speakers talking more than their allotted time at a dinner given by the National "Safety First" Association at the Vintner's Hall, E.C., in honor of the Royal Commission on Transport.

Better Than King Canute

The bridegroom was in a poetic frenzy as he strolled along the seashore. "Roll on, thou deep and dark blue ocean, roll," he recited to his bride.

"Oh, Gerald," she exclaimed "how wonderful you are. It's doing it."

BACKACHE

Wonderful relief from pain

Backache is one of those wearying complaints which bind all their victims together with a common bond of misery. And when any one suffers from backache finds a sure remedy, fellowship prompts the quick report of that discovery to others. Here's a woman who has her friend to thank for knowledge of a remarkably successful treatment. Now gratitude compels her, in turn, to pass along the good news to you.

"I am writing to tell you of the great benefit I have received from Kruschen Salts. My friend, Mrs. H., had received so much benefit that she begged me to give Kruschen a trial, although at first I was doubtful, because I had tried so many things. At last, however, I tried some of her Kruschen, and, feeling hopeful, I purchased a bottle, and I can honestly say that before I had finished the bottle my backache was gone. I have suffered for years with kidney trouble and dreadful headaches, and now to be free from the pain altogether is wonderful."—(Mrs. C.)

FREE TRIAL OFFER

If you have never tried Kruschen—try it now at our expense. We have distributed a great many special "GIANT" packages which make it easy for you to prove our claim for yourself. Ask your druggist for the new "GIANT" 75c. package.

This consists of our regular 75c. bottle together with a separate trial bottle—sufficient for about one week. Open the trial bottle first, put it to the test, and then, if not entirely convinced that Kruschen does everything we claim it to do, the regular bottle is still as good as new. Take it back. Your druggist is authorized to return your 75c. immediately and without question. You have tried Kruschen free, at our expense. What could be fairer? Manufactured by E. Griffiths Hughes, Ltd., Manchester, Eng. (Estab. 1756). Importers: McGillivray Bros., Ltd., Toronto.

Little Helps For This Week

"They helped every one his neighbor; and every one said to his brother, 'Be of good courage.' — Isaiah xli. 6.

When no low thoughts of self intrude, Angels adjust our rights; And love that seeks its selfish good Dies in its own delights. How much we take, how little give,— Yet every life is meant To help all lives; each man should live For all men's betterment.

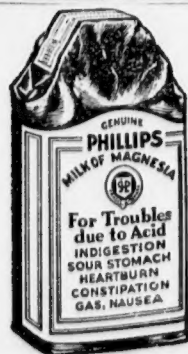

—Alice Cary.
Every human being whom we approach should be the better for us.—William Ellery Channing.

Each of us is bound to make the small circle in which he lives better and happier; each of us is bound to see that out of that small circle the widest good may flow.

—Arthur Penrhyn Stanley.

Talkies in German have been banned in Poland.

"Dry" ice is to be introduced into Australia.

ACID after meals

GET RID of your dread of pain after eating. Eat without fear of "indigestion," sour stomach, disagreeable gas or headaches.

When your food ferments, "dis-agrees," lies like a lump in your stomach, it's a sign of too much acid. You need not resort to crude methods—take instead an anti-acid that will correct the condition. Phillips' Milk of Magnesia.

A spoonful of this pleasant-tasting, soothing fluid neutralizes many times its volume in acid. It restores the proper alkaline balance to an acid—

(Made in Canada)

soaked stomach and bowels—assists these organs to function as they should.

Phillips' Milk of Magnesia is what you need when a bad breath, coated tongue, headaches, nausea or biliousness indicates an over-acid condition. Take a spoonful today and for several days and see how it sweetens the system. You won't be nearly so liable to colds or sickness. All drugstores in the Dominion sell it in 50c bottles.

Genuine Milk of Magnesia is always a liquid—never a tablet. Look for the name Phillips on the bottle.
